Mathematical Biosciences

an international journal

Volume 150

O. Arino, M. Lhassan Hbid, R. Bravo De La Parra, A mathematical model of growth of population of fish in the larval stage: Density-dependence effects 1

M.C. Runge, A.N. Moen, A modified model for projecting age-structured populations in random environments 21

M.P. Boer, B.W. Kooi, S.A.L.M. Kooijman, Food chain dynamics in the chemostat 43

K. Boucher, L. V. Pavlova, A.Y. Yakovlev, A model of multiple tumorigenesis allowing for cell death: Quantitative insight into biological effects of urethane 63

S.M. Debanne, D.Y. Rowland, Statistical certification of eradication of poliomyelitis in the Americas 83

Announcement: The Sixth Bellman Prize

K. Venkateswarlu, K.N. Ponnuswamy, M.R. Srinivasan, Estimation of variance components based on diallel model 105

E.K. Afenya, D.E. Bentil, Some perspectives on modeling leukemia 113

L. Esteva, C. Vargas, Analysis of a dengue disease transmission model 131

M. Altmann, The deterministic limit of infectious disease models with dynamic partners 153

Y. Cha, M. Iannelli, F.A., Milner Existence and uniqueness of endemic states for the age-structured S–I–R epidemic model 177
